Central & Eastern India's Leading Diagnostic Chain

Prevention is better than cure...

BSR LABS is a chain of Central & Eastern India's leading Superspeciality Pathology Labs.

As a true healthcare partner our emphasis has always been on Preventive Healthcare Solutions. We are the firm believer of the fact that every human being has a right to be in pink of his health throughout his or her life. Ironically this is not possible due to the present lifestyle and hectic schedules. We are becoming prone to lifestyle diseases like Stress, Depression which are resulting in High Blood Pressure, Diabetes, High Cholesterol levels inviting cardiac problems at a very early age of life. For any such uneventful situations we are always there as your savior, still we always suggest all our clients to do a regular preventive health check-ups for self and family. Continuing our legacy of spreading awareness about prevention and to help you lead a healthy and sound life, we have come up with wide range of Preventive Health Check-up packages especially for you which are tailor made in a way that suits all your requirements.

We also understand the fact of increasing healthcare cost which is pinching mostly to people like us and even if we wish to go for annual preventive tests for ourselves and our family, it would incur a huge cost. Considering these facts and to spread the awareness of Preventive Health Check-ups among the healthy population, we have priced these health check-ups at a very reasonable cost.
